

In the Claims

Please cancel claims 1-3, 5, 7-9, 15-25, 29-38, 40-43 and 47-49 without prejudice. Claims 39 and 44 are rewritten in independent form to include elements from Claim 38 instead of Claim 1.

Please amend the claims as follows:

- A2
- 09737321.121400
4. [The dispensing system of claim 1 wherein] A fuel dispensing system for enhancing cash transactions comprising:
- a) a fuel dispenser associated with a control system and a receiver adapted to receive signals including identification indicia from a remote communications unit associated with a customer, said receiver operatively associated with said control system to enable said control system to retrieve the identification indicia; and
  - b) a cash transaction indicator associated with said control system and adapted to signal said control system of a cash transaction; and
  - c) said control system providing customer related information associated with the identification indicia when a cash transaction is indicated by said cash transaction indicator; and
  - d) said customer related information corresponds to customer change resulting from a cash transaction, said control system adapted to determine the change for the transaction.

- A3
10. [The dispensing system of claim 1 wherein] A fuel dispensing system for enhancing cash transactions comprising:
- a) a fuel dispenser associated with a control system and a receiver adapted to receive signals including identification indicia from a remote communications unit associated with a customer, said receiver operatively associated with said control system to enable said control system to retrieve the identification indicia; and
  - b) a cash transaction indicator associated with said control system and adapted to signal said control system of a cash transaction; and

A3  
c) said control system providing customer related information associated with the identification indicia when a cash transaction is indicated by said cash transaction indicator; and

d) said cash transaction indicator is located on said dispenser and is actuated by a customer when a cash transaction is desired.

13. [The dispensing system of claim 1 wherein] A fuel dispensing system for enhancing cash transactions comprising:

A4  
a) a fuel dispenser associated with a control system and a receiver adapted to receive signals including identification indicia from a remote communications unit associated with a customer, said receiver operatively associated with said control system to enable said control system to retrieve the identification indicia; and

b) a cash transaction indicator associated with said control system and adapted to signal said control system of a cash transaction; and

c) said control system providing customer related information associated with the identification indicia when a cash transaction is indicated by said cash transaction indicator; and

d) said cash transaction indicator is located at a transaction terminal apart from said dispenser and is actuated when a customer desires a cash transaction.

26. [The dispensing system of claim 1 wherein said] A fuel dispensing system for enhancing cash transactions comprising:

A5  
a) a fuel dispenser including a dispenser control system and a receiver adapted to receive signals including identification indicia from a remote communications unit associated with a customer, said receiver operatively associated with said control system to enable said control system to retrieve the identification indicia;

b) a central control system operatively associated with and located apart from the dispenser control system;

c) a cash transaction indicator associated with said control systems and adapted to signal said control system of a cash transaction;

- A5
- d) said control systems having associated memory and operating to provide a customer transaction information and associate the customer transaction information with the identification indicia when a cash transaction is indicated by said cash transaction indicator; and
  - e) said cash transaction indicator is located at said dispenser at a transaction terminal.

- A6
- 09737331-121400
39. [The fuel dispenser system of claim 1 wherein] A fuel dispenser system comprising:
- a) a customer input device, display, and interrogator operatively associated with a dispenser control system;
  - b) said customer input device and display adopted to provide a customer interface;
  - c) said interrogator adapted to communicate with a remote communications unit associated with a customer;
  - d) said customer interface adapted to provide a cash transaction input for the customer to select a cash transaction;
  - e) said control system adapted to operate in conjunction with a remote communication unit to provide customer information associated with the remote communication unit; said interrogator communicates with when a cash transaction is selected; and
  - f) said customer information relates to the change due the customer as a result of the cash transaction.

- A7
44. [The fuel dispenser system of claim 1 wherein] A fuel dispenser system comprising:
- a) a customer input device, display, and interrogator operatively associated with a dispenser control system;
  - b) said customer input device and display adopted to provide a customer interface;
  - c) said interrogator adapted to communicate with a remote communications unit associated with a customer;
  - d) said customer interface adapted to provide a cash transaction input for the customer to select a cash transaction;
  - e) said control system adapted to operate in conjunction with a remote

communication unit to provide customer information associated with the remote communication unit said interrogator communicates with when a cash transaction is selected; and

- A7
- f) said fuel dispenser includes a cash acceptor associated with said dispenser control system for receiving cash payment, said dispenser control system adapted to determine a change amount for the transaction.

Respectfully submitted,
